

ALEXANDRIA'S LEXILE PACKAGE

Our advanced Lexile package allows teachers, librarians, students and parents to easily track student reading progress based on Metametrics standards. Easily import student lexile levels from your SIS or utilize our SIS Integration Package to seamlessly keep student data up to date near real time. (These can be retrieved from state standardized tests where applicable.) Print these graphs out for parent-teacher conference or to send home with report cards. Easily determine when a student has progressed from learning to read, to reading to learn.

BENEFITS OF THE LEXILE PACKAGE

- Lexile table in patron management: Input Lexile scores for each grade level and graph student progress in reading.
- Utility in Alexandria that updates the Lexile numbers in your system: We update the Lexile Server monthly with changes from MetaMetrics (New Titles). (MetaMetrics updates thousands of titles each year) (we have currently on our Lexile Server: 328180 Titles).

Students can search the library catalog using a Lexile range. When looking for books in the catalog, students can see the Lexile score assigned to each book, so they can choose according to their level.
