Installation Guide

Thank you for purchasing the Universal ID Scanner. The next few pages provide general information about the scanner and steps to install it.

Should you need further assistance or have any questions about the installation process, please contact COMPanion Customer Support at 1-800-347-4942 or email support@companioncorp.com.

Getting Started

If there is another scanner attached to your machine, it should be removed at this time. Also, if you previously used a V6450 or V6451 Drivers License Scanner, be sure to uncheck the **Enable ID Scanner** option in Workstation Management. It is not required for this scanner.

To properly program your scanner, first read and ensure that you understand the programming process, and then place the desired page(s) on a flat surface and scan the required codes for the desired operation.

This scanner uses custom firmware which should not be updated or reinstalled except when directed to by COMPanion.
