

Volunteer Application Preferences

Contents

Display

When you direct volunteers to your application, you want to make it clear what they are applying for. You also need to ensure they are asked to give you all the information you are going to need not only to review their application, but to get them started volunteering at your facility.

Volunteer Application Preferences is where you can manage various options for the [Application](#). The Display tab shows text that is displayed within the application.

The screenshot shows a web interface for 'Washington High School'. At the top, there's a header with 'Show All' and 'ACCOUNT' on the left, and a question mark icon on the right. Below the header, there are three tabs: 'Display' (selected), 'Optional Fields', and 'Custom Fields'. The main content area is titled 'Application Information' and contains the following text: 'This text is displayed at the top of the application. In addition to completing this application, all volunteers must receive volunteer training from a district school. Training will address blood-borne pathogens, sexual harassment, and procedures volunteers are to follow at the local school. A training schedule is available on our Web site.' Below this is a text input field. The next section is 'Application Completion URL' with the text 'When the application has been submitted, redirect the applicant to this URL.' and a text input field containing 'http://www.address.com'. Below that is the text 'Use this URL to access your online application:' followed by 'https://demo.keepntrack.com/apply'. At the bottom, there is a checkbox labeled 'Turn off Applications and display the following note:' which is currently unchecked, followed by a text input field.

Application Information

This is text that is displayed at the top of the Volunteer Application. Include any rules or guidelines for the application, including what the application is for.

✓ HTML is supported.

Application Completion URL

Once the application is complete, the applicant is redirected to this URL.

Turn Off Application and display the following note

If you aren't accepting applications at this time, don't leave people hanging! Check this box to turn off applications, then enter a note that will be displayed so people know what's going on.

Optional Fields

What do you actually need to know from your volunteer? Optional fields can be set to *disabled* (hidden), *enabled*, or *required*.

Custom Fields

Custom Fields allows you to create your own fields (questions) for the volunteer application and decide if those fields will be *disabled*, *enabled*, or *enabled and required*. Enter up to 8 custom fields that will appear in the [Application](#). Each custom field has a 500 character limit.

Custom Fields

KeepnTrack gives you the ability to create eight custom fields that appear in the Questions section of the online volunteers application. Additionally, you can Require that information is provided in these fields before your potential volunteer may continue.
