Auto-Hide

This preference allows you to automatically hide Titles with no copies that are not electronic resources from your Explors, Mobile, Search, Scout, Slideshow, and Browse Results. This may be convenient when adding title record information in advance of incoming copies. In addition, automatically hide Titles when all the copies for a Title are a combination of the selected statuses.

In other words, Auto-Hide settings allow you to hide Titles when there are no copies in circulation.

☐ **Enable Auto-Hide**
This will automatically hide titles that have zero copies and are not electronic resources.

Also Hide Title When All Copies Are Some Combination of...

☐ Lost	☐ On Repair	☐ In Processing
☐ Discarded	☐ On Order	☐ Unknown
☐ Library Use	☐ Archived	☐ In Transit

Preferences	Tools	Contact
Import		
The following settings will be used when adding your Mackin items to Alexandria. The system checks daily for new purchases to import.		
Use Policy Mapping		☐
View Preferences		
Policy for Printed Materials	Standard Item	
Title Update Matching for Printed Materials	ISBN OR LCIN & Title C...	
Set Copy Status to In-Processing	☒	
Policy for Ebook Materials	Standard Item	
Title Update Matching for Ebook Materials	ISBN OR LCIN	
Policy for Audiobooks Materials	Standard Item	
Title Update Matching for Audiobooks Materials	ISBN OR LCIN	
Export		
Mackin's web-based collection management tool will analyze your exported catalog, determine which titles and copies should be replaced, and how much it will cost to do so using their online book vendor service. The Mackin Export button creates a file that can be uploaded to Mackin for review and analysis.

The screenshot shows the Windows Firewall Advanced Security console. The left-hand pane displays the hierarchy: Windows Firewall > Windows Firewall Advanced Security > Inbound Rules. The right-hand pane shows the configuration for a new rule. The rule is named 'Google Toolbar' and is configured to allow connections from the Internet. The rule is currently disabled. The configuration details are as follows:

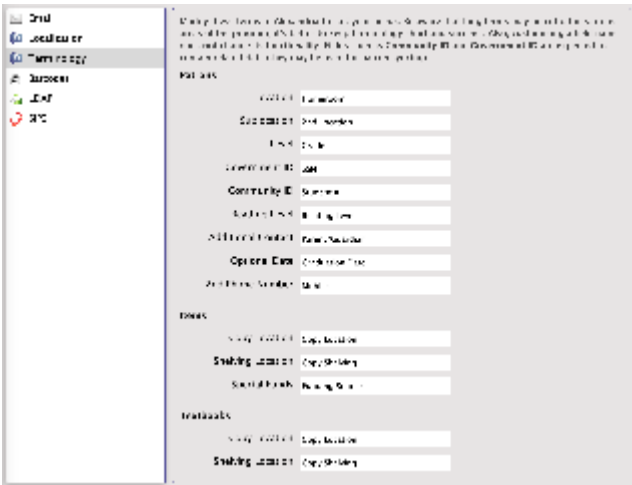

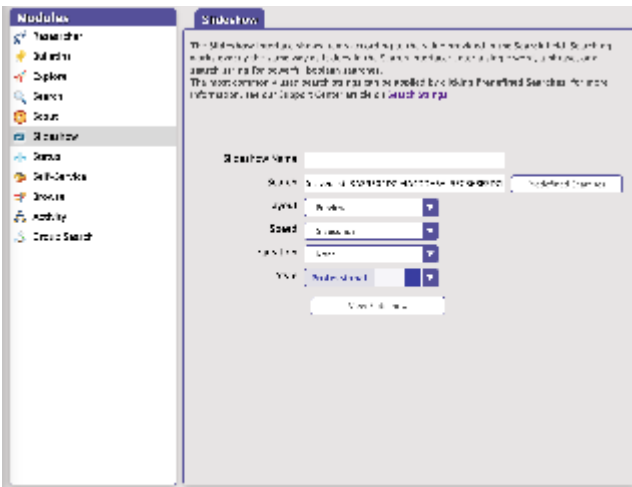

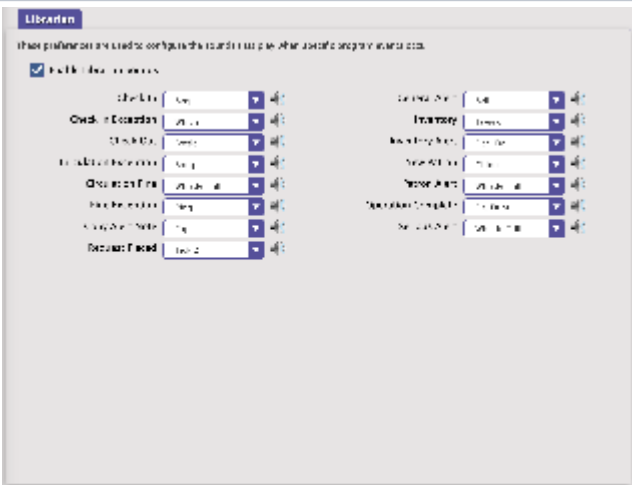

- Name:** Google Toolbar
- Group:** Google Toolbar
- Program:** C:\Program Files\Google\Google Toolbar\GoogleToolbar.exe
- Action:** Allow the connection
- Direction:** Inbound
- Scope:** All IP addresses
- Protocol:** All protocols
- Local ports:** All ports
- Remote ports:** All ports
- Advanced settings:**
 - Block this rule:** No
 - Logging:** No
 - Notifications:** No
 - Advanced settings:** No

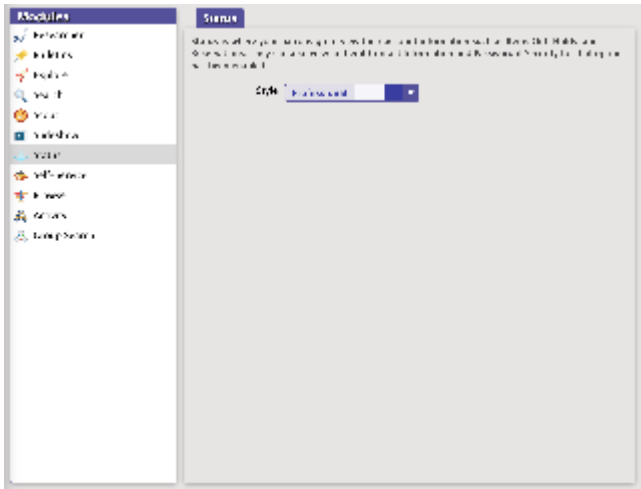

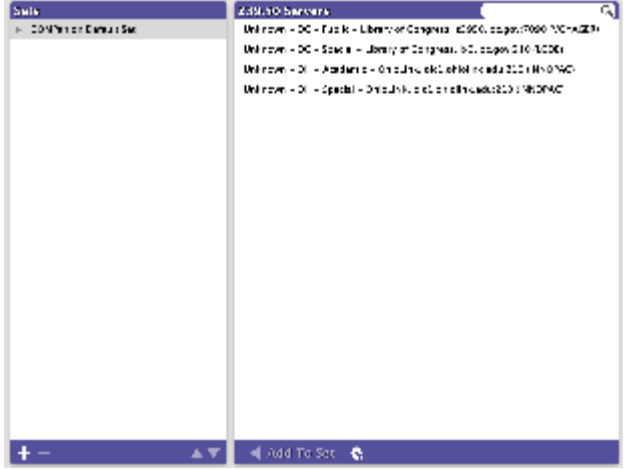

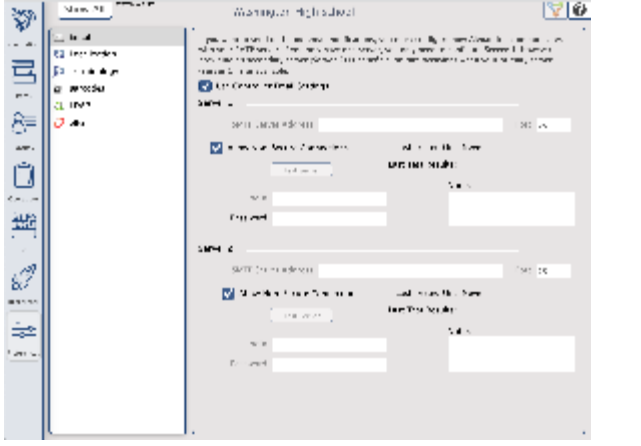

The rule is currently disabled, as indicated by the 'Status' column in the list of rules on the left.

 Student Field Mapping Field mapping is automatically configured to match and overwrite fields in Alexandria with fields in Clever, as documented in the Support Center. The fields below support optional mapping. Only modify these settings if you use different fields to identify your patrons between systems. Be careful! Changing how your data is mapped can help synchronize your database or wreak untold havoc. Please speak with Alexandria Customer Support before making any changes.
