

Builder: customize your search

November 27, 2023

Miss Honey knows that curating [Researcher](#) is an important part of empowering students to utilize the library. The different Searches available with Alexandria can be customized for your school based on the needs of your students—in [Builder](#).

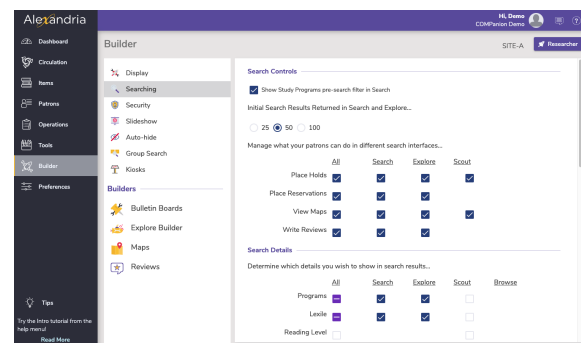

To customize your search, navigate to **Builder > Searching**.

Here, you can:

- manage what your patrons can do in different search interfaces
- determine which details you wish to show in search results
- decide which reading programs you want to highlight in each area of Researcher
- and select whether to record search terms.

We know that different areas of Researcher have different needs, so the settings in Searching allow you to customize each area separately.

Have questions about Builder, Researcher, or any other area of the program? Feel free to reach out to our support team at (800) 347-4942 · support@companioncorp.com.

Stay up to date on any support center outages by following [@companionstatus](#) on [Twitter](#).
