New & Improved

10 January 2020

What's New?

Take a look at these highly-request features!

Merge patrons. That's right! Now you can merge one patron with another, and keep all their lists, reviews, charges, checkouts, and more.

Card Expiring Notice report. Let patrons know their library cards are expiring soon with this email notice report.

Print more. Change the font size on your [5x10 labels](#), and print your [results in Search with cover art!](#)

7.19.18 Release Notes

If you self-host on a Mac, hold off updating to macOS 10.15 Catalina. Alexandria may be 64-bit compatible in an upcoming release.

New & Improved

Import

- Fixed patron imports to respect the *Ignore Leading Zeros on Barcodes* preference.

Items Management

- Improved SmartMARC to append instead of overwrite the genre tag (655_a) for existing items.

Operations Management

- Updated Operation Summary files to include the app name in the header (*Alexandria Librarian* or *Alexandria Textbook Tracker*).

Patrons Management

- Added the ability to [merge patron records](#).

Preferences

- Removed the *Allow Spaces in Barcodes* option in Barcode Preferences.
- Fixed a bug that was deleting data in the Grade and Lexile Tables.

Reports

- Added the [Copy Labels \(5x10\), Variable report](#), which allows you to choose the number of rows and font size.
- Added the [Card Expiring Notice report](#) to both Alexandria and Textbook Tracker, which allows you to send notifications to patrons whose library cards are expiring soon.

Researcher

- Changed printed Search results total terminology from *Bibliographies* to *Results*.
- Enhanced Search with the option to [print a list of results with cover art](#).
- Corrected a bug that was causing HTML markup to display in title summaries.

System

- Improved performance and reliability.

Update Notes

This page has been moved over to <https://support.goalexandria.com/release-notes/>

All release notes 23.9 and onward are on the new Support Center.

Cloud-Hosted Updates

When you host with us, we take care of all updates! During these updates—the second to last or last weekend every month (Saturday and Sunday)—please plan for possible downtimes with Alexandria. And if you need to contact Customer Support over the weekend, [please call us](#) (emails are only responded to during regular business hours Monday–Friday).

Self-Hosted Updates

Once all of the Cloud-Hosted servers have been updated, we will make the update available to Self-Hosted servers.

We highly recommend you consider [Cloud Hosting](#).

Not every version is able to update to the newest version, so the Available Updates window will only include those versions that meet your machine and version requirements.

Self-Hosted Notice - Mac

If you self-host on a Mac, hold off updating your servers to macOS 10.15 Catalina until you can update to Alexandria 22.8 or later (64-bit compatible releases).

If you self-host on a Mac, here's how to install the update on your Self-Hosted server:

1. [Log in to Alexandria](#).
2. Append **/admin** to the end of your Alexandria URL.
3. Click the **Actions** menu, then select **Check For Updates**.
4. Select the update version from the list, then click **Update**. Your update will now download.
5. The update screen will close automatically and you will be redirected to the login window.

Self-Hosted Notice - Windows

As of 2023 our self-hosted update process has changed.

If you self-host on a Windows machine and are on Alexandria 22.6 or earlier: [Contact us](#) for instructions and assistance updating to the latest version.

If you self-host on a Windows machine and are on Alexandria 22.12 or later, here's how to install the update on your Self-Hosted server:

1. [Log in to Alexandria](#).
2. Append **/admin** to the end of your Alexandria URL.
3. Click the **Actions** menu, then select **Check For Updates**.
4. Select the update version from the list, then click **Update**. Your update will download to the Updates folder in your Alexandria Support folder.
 - a. The download may take several minutes.
5. The update screen will close automatically and you will be redirected to the login window.
6. Once the installer has downloaded, and not before, quit Alexandria.
7. Remove your existing Alexandria application using **Add or Remove Programs** in System Settings.
8. Run the newly-downloaded Alexandria Installer.

Important Information

Version Numbering Change

As of 20.1, we've simplified our versioning scheme by dropping the series version. We now use the following:

- xx = academic year, beginning in June; yy = month

For example, 20.1 means:

- 20 = 2020 academic year
- 1 = The first monthly update (June)

Centralized Catalogs

If you have more sites than you are licensed for, contact our Sales team immediately at 1-800-347-6439. You can check this in Sites Management; the number of total sites plus the Union Site shows at the top, and the number you have licensed is at the bottom. The Union Site does not require an additional license.

Data Conversion

These Data Conversion notes are for Self Hosted users updating from v7 and switching from v6. If you are cloud-hosted or moving to cloud-hosted, we do everything for you!

Data conversions from older versions may not be supported. Before updating, please check the version you're currently running.

Updating from v7

If you're already running 7.17.12 or newer, you can update to the latest version. But if you're running an older version, you'll need to update a few times.

- **Running 7.16.3?** Update to 7.17.12 before updating to the latest version.
- **Running 7.16.2?** Update to 7.16.3, then to 7.17.12, before updating to the latest version.
- **Running an even older version?** Contact COMPanion Support for assistance. Depending on your current version, your upgrade path may go through one or more of the following: 7.15.3 7.16.2.6 7.16.3 7.17.12 Current Version

Upgrading from v6

The process to update from 6.23.1 to v7 is quite a bit different than updating from a more recent version. Check out our [v6 to v7 Conversion Guide](#) for more information.

- **Running 6.22.9 or older?** Update to 6.23.1, then to 7.17.12, before updating to the latest version.

Data conversion can take up to 10 minutes for a single database of average size or longer for larger collections and Centralized Catalogs, during which time the program will be inaccessible in your browser. Do not fear; it's still working. If you're concerned, check your server logs for a progress update.
