

Reservations in Researcher—Train your patrons

February 24th, 2020

Going along with [last week's tip](#), did you know that the reservations interface also changed in Researcher? Check out the updated dialogs and train your patrons on how to place reservations!

Version 7

Go through our [simple steps on placing a reservation in Researcher](#) with your patrons. It's very similar to placing reservations in Librarian, with an easy way to select dates.

The amount of reservations a patron can have and whether they're restricted by site is determined by [Patron Policies](#), and the maximum amount of reservation days and the number of days required between reservations are determined by [Item Policies](#).

Version 6

The reservations interface in v6 hasn't changed, but do you need a refresher on how it works for your patrons? Read through our instructions on [how to place a reservation in Researcher](#).

The updated reservations interface in Researcher is only available on version 7. Still on version 6? [Learn about switching!](#)
