Alexandria Requirements

Whether you're cloud-hosted or self-hosted, here are some requirements to successfully run Alexandria and Textbook Tracker.

> ⚠ If you're self-hosted, make sure to review some additional requirements.

Supported Devices

Our minimum size is **1024x768** (iPad size) for all areas of Alexandria and Textbook Tracker with the following exceptions:

- Researcher (hub)
- Scout
- Browse
- Status
- Slideshow
- Self-Service
- Activity
- Offline Mode

For the areas listed above, we support macOS, Windows, iOS, Android, and Chrome OS systems on newer versions of desktop, iPhone, iPad, Android, and Chromebook devices at their native resolutions. Since there are *a lot* of devices out there, we don't always know precisely which ones work with Alexandria. But our software also most likely runs on Samsung Galaxy, Surface tablets, Pixels, Nexus phones, and more.

Want to check if Alexandria works on your device? We encourage you to pull up our demo on the device in question! Go to demo.goalexandria.com.

Recommendations

Alexandria Web App	
Browsers	The latest two versions of Chrome, Edge, Firefox, and Safari. We recommend Chrome for the best experience.
Mobile OS	iPads and other mobile devices must be running one of the most recent two versions of their operating system so the browser can be updated to the most recent version.
Screen Resolution	1024 x 768 or higher
PDF Reader	
Our standard report format is PDF. We recommend using the latest version of Adobe Reader to view reports and print labels and notices.
