

From Me to You—Update Notices

Tip for: 03.26.18

If you are [Cloud Hosted](#), how can you tell when Alexandria will be updated? If you are [Self Hosted](#), how do you know when an update will be available for you?

We are excited to share what's new, so there are a number of ways we let you know about updates.

- **Email.** We send out emails letting you know what cool things are coming with the next update. Are you getting these emails? Click **Update Subscription Preferences** at the bottom of *this* email to see what lists you are subscribed to. Make sure you check **Alexandria v7 Updates** or **Alexandria v6 Updates**!
- **Message Center.** When there is a red dot on the Message Center icon (from Circulation), that means there's a new message for you. We usually post in the Message Center once you have been updated to a new version.
- **Login screen.** For v7 Cloud-Hosted users, we can now send messages directly to your login screen when an update is coming.

When you see that an update is coming, don't forget to check the [Release Notes](#) for a more complete list of changes, and if you have any special concerns, contact Support at 1.800.347.4942.
