Operator Alert

The Operator Alert utility allows you to enter a 100 character message that will display to the Operator in a popup window when the patron attempts to sign in or out through Attended Kiosk. The alert message can be accessed and customized by going to People Management > Access.

If the Patron is unauthorized for the Classification they are attempting to sign into, they will receive the following message:

If the Patron is denied access to the facility, they will see the following message:

If the Patron has a Sign In Message and an Operator Alert, they will be displayed simultaneously.

ALERT: John needs to fill out a new application.
