

# Sharing is Caring—Share Explore Panes

Tip for: 05.14.18

Have you crafted some really useful or creative Explore Panes? You can share them—export the pane to share searches, links, actions, [icons](#), and more!

This works in v6 and v7 of Alexandria! (...But not between the two.)

In [Explore Builder](#), click on a pane, and use the actions menu at the bottom to Export Pane.

This will create a .txt file (download through Operation Management) that can be imported by another site or user into Alexandria.

The other user will open Explore Builder, and use the actions menu to Import Pane.

(As easy as that.)
