System

- Export Log

The screenshot shows the 'Export Log' interface. On the left, a 'Categories' sidebar lists 'All Exports', 'Patrons', 'Textbooks', 'System' (selected), and 'Circulation'. The main area has tabs for 'Quick' and 'Saved'. Below the tabs is a search bar labeled 'Filter'. The 'Exports' section lists 'Export Log' and 'User Sessions'. The 'Selections' section is titled 'Export system logs for:' and contains a 'Log timestamp' field with 'From MM/DD/YYYY' and 'Through MM/DD/YYYY' date pickers, both set to '13', and a dropdown arrow.

Log timestamp: Enter a date range or relative date of system log information you would like to export. The default is from the current date at midnight to the current date and time. It will export as a tab-delimited .txt file.

- Export User Sessions

The screenshot shows the 'Export User Sessions' interface. The 'Categories' sidebar is the same as the previous screenshot. The 'Exports' section lists 'Export Log' and 'User Sessions'. The 'Selections' section is titled 'Export user session (login/logout) data for:' and includes a note: 'NOTE: This information is typically available for the last six months.' Below the note is a 'Log timestamp' field with 'From MM/DD/YYYY' and 'Through MM/DD/YYYY' date pickers, both set to '13', and a dropdown arrow.

User Sessions export shows login/logout/session data.

Log timestamp: Enter a date range or relative date of system log information you would like to export. The default is from the current date at midnight to the current date and time. It will export as a tab-delimited .txt file.

Data is typically available for the last six months.
