Shortcut to Preferences

Tip for: 10.16.17

If you enjoy keyboard shortcuts, you will love to know there is one to open **Preferences** from **Circulation**.

Use command-comma (**,**) or control-comma (**ctrl ,**)*, and a new tab or window will open to your Alexandria Preferences.

*Update: We've heard that control–semi-colon (**ctrl ;**) may be the key for some of you, depending on OS and browser!*

This shortcut works in version 7 and version 6 of Alexandria!
