Share Your Love With Lists (& Reviews)

Tip for: 02.08.16

We have all heard that sharing is caring. With Alexandria, we allow you to do just that with shared lists in v7 and reviews in v6 & v7.

For sharing lists, all you have to do is create your lists, then set them as Public.

Sharing Lists in **Alexandria v7**:

- Log in to **Search** by clicking **Log In**.

- Click on the **My Lists** button to create a list and name it.

- Perform your search (e.g. U.S. History).

- Select a result (or multiple results), and click the list icon OR click the list icon at the top of your results and select **Add All to List** or **Add Selected to List**.

- Add to your recently created list.

- Open your list and use the list icon at the top to **Edit List**.

- Change the sharing to **Public** and click **Save**.

- Click the **Share** icon.

With the link, you can simply share your list with whomever you would like. All you have to do is post the link on your website—or, of course, you can simply email it to someone. It's simple!

Another way you can share is with reviews. Reviews are a great way to generate reading interest for all your readers. It's easy too!

To add a review in **v6** or **v7**:

- In Researcher, **Log In**.

- Find the book you want to review.

- Click on the stars, or hover your cursor over the **Stars** and click **Add Review**.

- Write your review, pick a star rating, and save it.

Note: Reviews may require approval. See Reviews Management.
