Mackin is an optional Alexandria integration. [Contact our Sales Team](#) if you're interested in adding it to your library!

Alexandria is integrated with Mackin's web-based collection management tool. This functionality allows operators to automatically export their data from Alexandria in MARC format and have it uploaded to Mackin for review.

Operators will want to use Mackin to review their catalog to see what copies and titles should be replaced, and how much it will cost to do so using their book vendor service.

This functionality also allows operators to link directly to Mackin's online book ordering system. A single sign-in solution allows operators to automatically authenticate their Mackin online account and immediately start shopping.

An operator can export their data from Alexandria in MARC format, either manually or automatically, depending on their Mackin vendor Tools settings in Alexandria.

Settings

Settings

The screenshot shows the Alexandria web interface. On the left is a dark sidebar with navigation links: Dashboard, Circulation, Items, Patrons, Operations, Tools, Builder, Preferences (highlighted), and Tips. The main content area is titled 'Preferences - Services' and features a list of services on the left and a settings panel on the right. The services list includes Axis 360, Baker & Taylor, BestMARC, Bound to Stay Bound, Capstone Interactive, Capstone PebbleGo, Capstone Publishers, Gumdrop Books, Mackin (selected), MackinVIA, netTrekker, and NovelList. The settings panel for Mackin has three tabs: Settings, Tools, and Contact. The 'Settings' tab is active, showing the Mackin logo, a description of the service, and fields for 'Vendor URL' (http://www.mackin.com), 'Mackin Username' (demo), and 'Mackin Password' (masked with dots and a 'show' link). A status indicator 'On' with a checkbox is visible in the top right of the settings panel.

- **Enable Mackin.** When enabled, a Mackin selection will appear in the Vendors drop-down menu located in the Current Item pane of the Circulation window. Selecting Mackin from the Vendors menu will take you to the address provided in the Vendor URL field.
- **Vendor URL.** Once a valid URL address is supplied in this field, the Show Vendor Link checkbox becomes available and the places the Account Website button in the Tools tab of the Vendors window.
- **Mackin Username.** This username provided by Mackin when you purchase an account from them.
- **Mackin Password.** This password provided by Mackin when you purchase an account from them.

Tools

This screenshot shows the 'Tools' tab of the Mackin service settings in the Alexandria web interface. The sidebar and service list are identical to the previous screenshot. The 'Tools' tab is active, displaying 'Import' and 'Export' sections. The 'Import' section explains that settings will be used for adding Mackin items and lists several dropdown menus: 'Print Title Update Matching' (ISBN OR LCCN & Title Call Number), 'Print Policy' (Standard Item), 'New Copy Status' (In Processing), 'Ebook Title Update Matching' (ISBN OR LCCN & Title Call Number), 'Ebook Policy' (Standard Item), 'Audiobook Title Update Matching' (ISBN OR LCCN & Title Call Number), and 'Audiobook Policy' (Standard Item). There is also a checkbox for 'Use Policy Mapping when available' and a text field for 'Notify me on import' (myemail@school.edu). The 'Export' section contains a description of the Mackin Export button and a 'Mackin Export' button, along with an unchecked checkbox for 'Export all sites'.

Import

The following settings are used when adding Mackin records to your database. Alexandria checks for new purchases to import on a daily basis.

Use Policy Mapping

When checked, Mackin records will be imported according to your Call Number Policy mapping, rather than the policies for Printed, eBook, and Audiobook Materials settings described below.

View Preferences

This is a shortcut to your Policy Mapping preferences.

Policy for Printed Materials

The policy selected from this drop-down menu will be used for Mackin printed materials imported into Alexandria. Default is Standard Item.

If *Use Policy Mapping* (above) is checked, this setting will be disabled.

Title Update Matching for Printed Materials

Use this drop-down menu to select how your printed titles will be matched:

- ISBN OR LLCN (default)
- ISBN OR LCCN & Title Call Number
- Title & Author & Medium
- Title & Author & Medium & Title Call Number
- Copy Barcode

Set Copy Status to In-Processing

This sets the copy status of all Mackin item records being imported to In Processing. Later, you can run an automatic utility to change the copy status to Available. This is convenient when Mackin items are imported into Alexandria, but not ready for general circulation.

Policy for eBook Materials

The policy selected from this drop-down menu will be used for Mackin eBook records imported into Alexandria; default is Standard Item. If you selected *Use Policy Mapping* (above), this setting will be disabled.

Title Update Matching for eBook Materials

Use this drop-down menu to select how your eBook titles will be matched.

Policy for Audiobook Materials

The policy selected from this drop-down menu will be used for Mackin audiobooks that are imported into Alexandria; default is Standard Item. If you selected *Use Policy Mapping* (above), this setting will be disabled.

Title Update Matching for Audiobook Materials

Use this drop-down menu to select how your audiobook titles will be matched.

Export

Mackin's web-based collection management tool will analyze your exported catalog, determine which titles and copies should be replaced, and how much it will cost to do so using their online book vendor service.

- **Mackin Export.** This button is used to create a MARC-format file of your collection that can be uploaded to Mackin for review and analysis.
- **Export All Sites.** Check to export data from all sites.

Manual Export

Alexandria will perform an export manually when the Mackin Username and Mackin Password fields are not provided.

1. For a manual export, there should be no entry supplied in the Mackin Username and Mackin Password fields, located under the Links tab.

2. Next, click on the Mackin Export button, located under the Tools tab, to export your data.
3. An Item Export entry will be added to the Operation Management window and the export will be queued for completion.
4. Once the export is complete, an operating system standard browse window will appear which allows you to choose where you want to save the MARC export. By default, the file will be titled " Item Export.txt ".
5. You will then have to log into Mackin's website and follow their instructions for manually uploading your file to their review service. At the time of this writing, you could access the Collection Analysis Tool by clicking on the Collections link. Then, after clicking on the Upload MARC Records link in the sub-menu that appears, the customer can then use Mackin's tools to upload the file they export from Alexandria.

Automatic Export

When the Mackin Username and Mackin Password fields are provided:

1. In Alexandria, click on Show -> Vendors and then select the Mackin (i.e. Mackin) option.
2. For a automatic export, operators should have supplied their Mackin Username and Mackin Password fields in the main Makin Preferences tab.
3. Next, click on the Mackin Export button, located under the Tools tab, to export your data.
4. An Item Export entry will be added to the Operation Management window and the export will be queued for completion.
5. Once the export is complete, the file will be automatically uploaded to Mackin's server for review.
6. After the file transfer has finished, an Alexandria confirmation window will appear:
 - "Your collection was successfully uploaded to Mackin's website. Please allow 5 - 7 days to process. You will receive an email from Mackin when their review is complete."

Contact

Under the **Contact** tab, you can fill out contact information for your **Mackin** representative.

The screenshot shows the Alexandria library system interface. The top navigation bar includes the Alexandria logo, a user profile section with 'Hi, Demo' and 'COMPanion Demo', and a 'SITE-A' label. The left sidebar contains a menu with options: Dashboard, Circulation, Items, Patrons, Operations, Tools, Builder, Preferences (highlighted), and Tips. The main content area is titled 'Preferences - Services' and features a list of service providers on the left and a form on the right. The service providers list includes Axis 360, Baker & Taylor, BestMARC, Bound to Stay Bound, Capstone Interactive, Capstone PebbleGo, Capstone Publishers, Gumdrop Books, Mackin (selected), MackinVIA, netTrekker, and NoveList. The 'Contact' tab is active, displaying a form with fields for Contact Name, Title, Email Address, Phone Number, Mobile Phone Number, Fax Number, Customer Service Phone, Customer Service Email, Customer Service Fax, Address (line 1 and 2), City, State/Province, Postal Code, and Country. A 'Notes' section is also present at the bottom of the form.
