

# Demo Data

Our demos are complete with a sampling of all record types for illustration purposes - patron reviews, saved lists, maps, bulletins, subscriptions, routes, etc.,

The standard demo is configured as a K12 library, illustrating a single site environment (in this case with all levels), while the Centralized Catalog demo is also a K12 library but configured to illustrate a single database housing data for 3 separate sites.

Demo Data includes 610 Patrons, 5563 Titles, and 6874 Copies. These are distributed in a roughly balanced way across 3 levels in both the standard and Centralized Catalog demo's.

While our demo environment is configured as a school library, Alexandria can be configured for use in public, professional, or private libraries as well. Levels are not required and much of our terminology configured for school use can be customized by the administrator.
